

Histone H2A type 1

Variant: H2A (xenopus)

SwissProtID: P06897

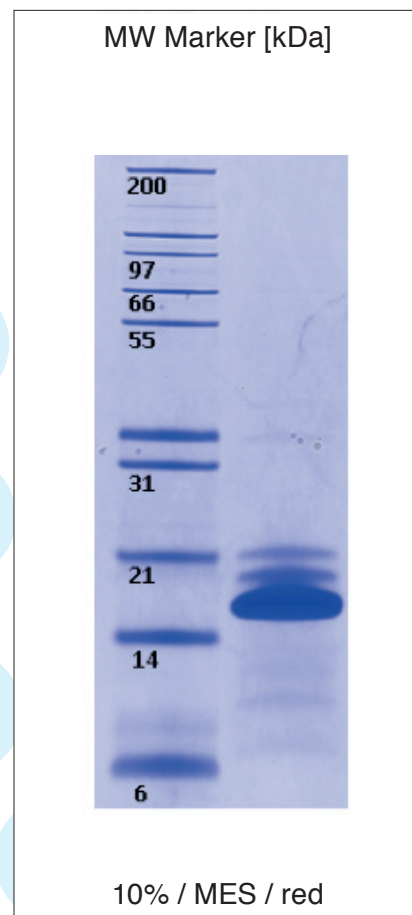

Catalog No.: PR-0092

Product description:

H2A (xenopus) was expressed and purified from E. coli. The protein was expressed as an untagged protein, refolded and purified by an 1-step chromatographic procedure comprising an ion exchange chromatography step. It was lyophilized from H2O.

Storage buffer: -

Purity: > 90%

Example Batch Information

Conc.: -

Batch: 01/6

MW: 14 kDa

Stored at -80°C. Reconstitute lyophilized powder using appropriate buffer. Store on ice during use. Snap refreeze, for example in liquid nitrogen and dry ice/ethanol. Avoid repeated thawing and freezing.
