

Genome polyprotein

Variante: HCV NS3/4a (1-180)

SwissProtID: Q9WMX2

Catalog No.: PR-0096

Product description:

HCV NS3/4a was expressed and purified from E. coli. The protein was expressed with a charged tag and purified by a 4-step chromatographic procedure comprising affinity and ion exchange chromatography steps.

Storage buffer: 25 mM HEPES/NaOH
pH 7.0; 10% Glycerol;
5 mM DTT

Purity: > 95%

Example Batch Information

Conc.: 17.7 mg/mL (Bradford)

Batch: 02/1

MW: kDa

Stored at -80°C. Thaw rapidly and store on ice during use. Snap refreeze, for example in liquid nitrogen and dry ice/ethanol. Avoid repeated thawing and freezing.
