

## Genome polyprotein

**Variant:** HCV NS3/4a (1-181)

**SwissProtID:** Q9WMX2

**Catalog No.:** PR-0097

### Product description:

HCV NS3/4a was expressed and purified from E. coli. The protein was expressed as a C-terminal HIS-fusion protein and purified by a 2-step chromatographic procedure comprising affinity and size exclusion chromatography steps.

**Storage buffer:** 15 mM MES/NaOH pH 6.5;  
0.5M NaCl; 20 mM  $\beta$ -ME

**Purity:** > 95%

### Example Batch Information

**Conc.:** 29 mg/mL (Bradford)

**Batch:** 02/11

**MW:** kDa

Stored at -80°C. Thaw rapidly and store on ice during use. Snap refreeze, for example in liquid nitrogen and dry ice/ethanol. Avoid repeated thawing and freezing.
