

Proteasome

Variant: Yeast Proteasome (20S core particle)

SwissProtID: P30656 etc.

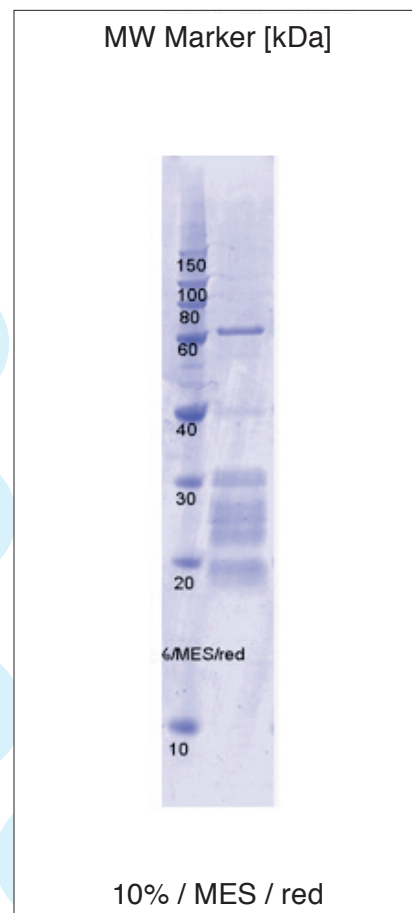

Catalog No.: PR-0198

Product description:

The Proteasome 20S core particle was purified from *S. cerevisiae* by a 4-step chromatographic procedure comprising ion exchange and size exclusion chromatography steps.

Storage buffer: 20 mM TRIS 7.5;
1 mM NaN₃

Purity: > 90%

Example Batch Information

Conc.: 53 mg/mL (Bradford)

Batch: 02/2B

Stored at -80°C. Thaw rapidly and store on ice during use. Snap refreeze, for example in liquid nitrogen and dry ice/ethanol. Avoid repeated thawing and freezing.
